

Oracle Grant Create Table In Own Schema

Oracle grants the ability to create tables in your own schema. This is useful for creating a table in a schema other than the one you are currently in. To do this, you need to use the GRANT CREATE TABLE statement. This statement allows you to grant the CREATE TABLE privilege to a user or role. Once you have granted the privilege, you can then create a table in the schema of the user or role. For example, if you want to create a table in the schema of a user named 'SCOTT', you would use the following statement:
